

BUSINESS PROCESS MANAGEMENT

Modernizing legacy systems with the right architecture and a transformed infrastructure is complex. It requires a trusted advisor that knows how to connect the dots between strategy, planning, and your agency's unique enterprise environment. Powered by our CMMI level 3 certified processes and project management expertise, you can be confident that from strategically roadmapping your enterprise to leveraging technology, IntelliDyne is ready and enabled.

Aligned with Government CIOs' missions and goals, IntelliDyne's Business Process Management solutions deliver concrete and measurable business value at each and every step. As your trusted advisors, our consultants are committed to helping you achieve your mission and vision without compromise. IntelliDyne's solutions enable clients to maximize flexibility and agility of current assets, and increase productivity while reducing your costs, enhancing management insight and achieving scalable and agile growth that suits the needs of critical enterprise environments.

When change is the only constant, IntelliDyne delivers results to our clients with agility and expertise that are second to none. Our DNA is made up of a unique blend of attributes, creating a full client experience with predictable outcomes. Every time.

- ▶ Increase Productivity While Reducing Costs
- ▶ Enhance Management Insight
- ▶ Achieve Scalable and Agile Growth That Suits Client Needs
- ▶ Create Transparency and Visible Accountability

IntelliDyne, LLC is a consulting firm that enables better business performance through innovative technology solutions. We manage public sector programs that deliver higher operational efficiency and measurable value to clients. We advise, develop, and execute effective solutions in Information Assurance/Cyber Security, Cloud Computing, Application Development and Mobile Computing, Analytics, Business Process Management, Data Center Consolidation, Enterprise Collaboration and Enterprise Infrastructure Management.

IntelliDyne's client, Defense Acquisition University (DAU), needed a solution to address the challenges brought on by the largely manual Military Interdepartmental Purchase Requisition (MIPR) process. The solution needed to address inefficiency, duplication of resources and risks associated with human error while providing real-time cross-departmental visibility and transparency.

In less than half the time required by previous developers, IntelliDyne's team of advisors and expert technologists planned, developed and deployed a flexible, scalable and automated BPM technology platform with workflow and dashboard capability.

As a result, the client has streamlined, controlled processes to track incoming and outgoing MIPRS electronically and effectively search and archive documentation, maximizing accountability and expediting client relationship management in real-time.
