

## ENTERPRISE COLLABORATION MANAGEMENT

More security or more collaboration? Get both. IntelliDyne guides clients to solutions with intuitive and effective collaboration tools, scalable architecture and state of the art security. Realize tremendous improvements in productivity, bringing business value to your user community and your IT budget, all while protecting access to critical, sensitive information.

Aligned with Government CIO's missions and goals, IntelliDyne's Enterprise Collaboration Management solutions deliver concrete and measurable business value at each and every step. Collaborate, integrate, create, capture, organize and access the information valuable to you and only you. As your trusted advisor, IntelliDyne experts craft an efficient collaboration strategy, connect disparate information assets, unify volumes of structured and unstructured data and create effective user adoption solutions. And when it comes to running these applications and storing data efficiently and securely? IntelliDyne has you covered there, too.

When change is the only constant, IntelliDyne delivers results to our clients with agility and expertise that are second to none. Our DNA is made up of a unique blend of attributes, creating a full client experience with predictable outcomes. Every time.

IntelliDyne, LLC is a consulting firm that enables better business performance through innovative technology solutions. We manage public sector programs that deliver higher operational efficiency and measurable value to clients. We advise, develop, and execute effective solutions in Information Assurance/Cyber Security, Cloud Computing, Application Development and Mobile Computing, Analytics, Business Process Management, Data Center Consolidation, Enterprise Collaboration and Enterprise Infrastructure Management.

### Clients Demand. IntelliDyne Delivers.

"Our organization contracted IntelliDyne to lead critical support and development activities for our enterprise wide Intranet System, built on Microsoft's SharePoint platform. The team was responsible for migrating [our agency's] previous legacy Intranet to a SharePoint based platform, to enhance internal collaboration through broader access, easier usability, modernized security, and web portal capability. The project included content audits, usability surveys and design mock-ups, development of migration plans and execution, and the development of a customer advocate tool for tracking collaboration and training requests. The team created more than 20 content databases to support the many business offices [across the enterprise]. They were tasked with meeting the needs of the individual offices while still maintaining a unified system to serve the enterprise. It was a complex effort, and the IntelliDyne team was relied upon as subject matter experts in the development and design of an effective tool; and they delivered!"
