WHO WE ARE

Founded in 2017 and headquartered in Hawaii, Galapagos is a Small Disadvantaged Business (SDB) registered with the Small Business Administration (SBA) under Na Oiwi Kane, A Native Hawaiian Organization (NHO). We combine the stability and capability of a large organization with the flexibility, agility, and customer care of a small business, backed by over 30+ years of IT management experience.

As a prime contractor supporting the Defense Health Agency (DHA) within INDOPACOM, including the PACAF Surgeon General and Tripler Army Medical Center, we excel in delivering comprehensive Health IT solutions. Our expertise includes system engineering, systems integration analysis, and network and infrastructure integration across multiple domains.
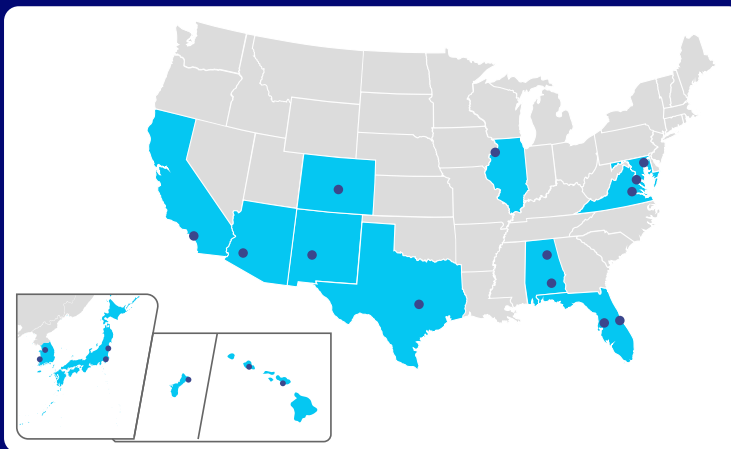

Our seasoned Subject Matter Experts (SMEs) bring over 20 years of experience in supporting Operational Medicine (OpMed) software and enterprise architecture. Our experts have decades of experience in the design, development, testing, and implementation of critical Operational Medicine IT domains such as Health Care Delivery (HCD), Theater Blood (TBLD), Medical Situational Awareness (MedSA), and Medical Command and Control (MedC2) systems.

Leveraging the long-standing success and experience of our management team and Na Oiwi Kane, Galapagos is capable of successfully competing for and executing large business contracts.

Our success is largely based on our ability to quickly adapt and respond to customer needs, providing not only the technical expertise necessary to deliver essential solutions but also the mature management and leadership required to support and sustain large initiatives.

At Galapagos, we strive to be a role model in business and community, do the right thing for our employees and DHA customers, create lasting customer relationships as a partner rather than a vendor, and attract and retain a first-class workforce dedicated to excellence in Health IT.
