

MILITARY HEALTH IT INFRASTRUCTURE CAPABILITIES

Founded in 2022 and headquartered in Hawaii, Galapagos-IntelliDyne Solutions (G&I) is a SBA-approved mentor-protégé joint venture (MPJV) that brings together Galapagos, LLC – a certified Small Disadvantaged Business 8(a) with the Small Business Administration (SBA) under Nā 'Ōiwi Kāne, a Native Hawaiian Organization (NHO), and IntelliDyne, LLC – a market-leading IT services firm that has been delivering information technology services and solutions to Government agencies on matters of national, state, and local importance for over two decades.

Our MPJV structure provides large organization stability, a centralized back office, and 30+ years of cybersecurity, information assurance, and enterprise network management experience from the keyboard to the cloud. Leveraging the know-how and successful track record of our management team with the combined strength of Galapagos and IntelliDyne capabilities, G&I offers small business agility backed by large business reliability.

As a trusted partner to the DHA for over 20 years, G&I is deeply rooted in supporting the IT Infrastructure of the DHA and continues to provide network, domain, server, and security support, including:

- Local IT workstation, network, group policy and organizational unit support for the Global Service Center (GSC), utilized worldwide for DHA end users
- Critical workstations and network infrastructure for government agency leaders, senior executive service staff, and VIPs
- Deskside, video teleconferencing, vulnerability management, storage management, and more
- Transitions away from legacy domains and toward standardization and consolidation
- Changes to server hosting, such as from on-premises to Cloud, as well as hybrid solutions or movement to (MHS) Application Access Gateway (MAAG) sites
- Hosting for onsite applications and websites for critical services, surpassing over 99.9% uptime while ensuring network security standards

The Defense Health Agency (DHA) is undergoing a major transition as the agency strives toward a standardized infrastructure to support medical treatment facilities (MTFs) and other lines of business (OLBs). This transition is a monumental effort to unite locations that were once under the direction of the Armed Forces, to a single architected plan under the DHA.

NETWORK CAPABILITIES

- Infrastructure Consolidation and IT Modernization
- Server and Workstation Virtualization
- Infrastructure as a Service and Shared Services Implementation
- Cybersecurity
- Enterprise Network and System Engineering
- Enterprise Operations and Management
- System and Application Integration
- Network, Server, and System Security
- Asset Management
- Video Teleconferencing and Voice-Over-IP
- Service Desk: Tier I, II, III and VIP Support

NETWORK IMPACTS

- Process-Driven Predictability
- Streamlined, Efficient Operations Across the Enterprise
- Accelerated, Virtualized Access for Remote Locations
- Lower Overall Risk to Operations
- Increased Business Operations Agility and Maximized Productivity
- Significant Reduction in User Issues
- Client Satisfaction Ratings Above 99%
- Efficient Technology Leading to Lower Cost of Operations
- Enhanced Collaboration
- Increased Security Posture
- Minimized Risk and Data Loss

A TRUSTED PARTNER FOR THE DHA'S CYBERSECURITY NEEDS

Since 2001, G&I has provided information assurance security operations services for the Defense Health Agency (DHA). We actively monitor thousands of devices for security vulnerabilities and active attacks. Every year, we stop hundreds of intrusions and patch thousands of vulnerabilities. For over a decade, G&I Solutions has maintained continuous Authority to Operate (ATO) coverage from DIACAP to RMF under the DHA. With multiple CONUS locations, we have effectively managed thousands of assets, ensuring efficient operations. G&I's exceptional performance has been recognized by receiving an "Excellent" score on three Command Cyber Readiness Inspections (CCRIs), including a No-Notice CCRI, validating the company's robust security measures. G&I has been instrumental in supporting CSSP inspections and facilitating the Interconnection Support Agreement (ISA) between the USAF and DHA, showcasing its commitment to bolstering cybersecurity and enabling seamless interagency collaboration. G&I remains dedicated to excellence and comprehensive security measures as a trusted partner for the DHA.
